Data sources

Wikipedia

List of postal codes, boroughs and neighborhoods of Toronto from
https://en.wikipedia.org/wiki/List_of_postal_codes_of_Canada:_M
This contains the list of Toronto, its boroughs and neighborhoods which will be identified with postal codes. I will clean and extract only those neighborhoods which are in Toronto borough.

Geospatial data

I will use a csv file from 'https://cocl.us/Geospatial_data' to get latitude and longitude coordinates of each neighborhood. This will help me in finding the exact location of venues.

Foursquare API

I will use the Foursquare API in listing the most popular venues of each location and in determining the location where a chinese restaurant has more demand and less competition.
